

# MEETING MINUTES

**Topic:** Tunnel Construction Committee Meeting Number 13 – March 27, 2014

**Location:** Harbourfront Community Centre

**Attendees:**

Ryan Gow	Forum Equity Partners Inc.
Ken Lundy	Toronto Port Authority
Gene Cabral	Toronto Port Authority
Deborah Wilson	Toronto Port Authority
Russ Martin	PCL Constructors
Mario Silva	TDSB
Heino Molls	Bathurst Quay Neighbourhood Association
Hal Beck	Bathurst Quay Neighbourhood Association
Henry Piersig	Bathurst Quay Neighbourhood Association

**Distribution:**

Attendees	
Mario Silva	TDSB
Charlotte Sam	St. Stephen's Waterfront Daycare
Kathryn Exner	The Waterfront School Parent Council
Christopher Dunn	City of Toronto, Waterfront Secretariat
Kimberley Kilburn	City of Toronto, Municipal Licensing & Standards
Ken Shier	PCL Constructors
Rudy Pirosko	Ministry of the Environment
Barb Lachapelle	Toronto Public Health
Karen Barnes	The Waterfront School
John Horne	Bathurst Quay Neighbourhood Association
Leona Rodall	Harbourfront Community Centre
Gabriela Kurzydowski	City School
Rod Adams	Ministry of the Environment
Paula Budhlall	The Waterfront School
Joseph Svec	Bathurst Quay Neighborhood Association
Beverly Dywan	City School Parent Council
Joan Prowse	Bathurst Quay Neighborhood Association
Jackie Garrison	The Waterfront School Parent Council

**Date:** March 27, 2014 (19:00 – 21:00)

## ACTION ITEMS

No.	Action	Responsible	Status / TCD
1	Presentations to be circulated to all attendees following TCC Meeting (See Attachment 1).	Forum	Complete

## **MEETING MINUTES: “QUESTIONS & DISCUSSION”**

**Question:** Have there been any noise complaints with respect to concrete deliveries?

**Answer:** No complaints have been received.

**Question:** Have the potential noise and vibration impacts from the elevators and escalators been assessed? Is there a tunnel noise study available?

**Answer:** Noise and vibration criteria are referenced in several sections of the Project’s Design and Construction Specifications requiring the Facility to comply with Good Industry Practice, municipal by-laws and standards.

For example, the maximum transmitted airborne noise level for each escalator or moving walkway shall be 65 dbA at a point approximately 1500 mm above the step/pallet treadway throughout the length of the unit’s travel. The structural system will be designed to minimize the effects of vibration due to type of occupancy or equipment operation in related areas of the Facility. All mechanical, HVAC, plumbing and fire protection systems will be vibration isolated to minimize noise and vibration through the structure or other components.

---

### NEXT MEETING:

May 27, 2014 – 7:00 PM Harbourfront Community Centre
